PROFILE

Results-driven Computer Science graduate with hands-on experience delivering scalable software solutions across web development, data science, and machine learning. Skilled in building microservices architectures, integrating third-party APIs, and applying statistical and machine learning methods to real-world problems. Proven ability to work in fast-paced, collaborative environments, communicate technical concepts clearly to diverse stakeholders, and adapt quickly to new tools and requirements. Seeking to grow as a software developer and data scientist, contributing to teams building impactful, data-driven products.

EXPERIENCE

Junior Web Developer | Pendomedia — Nairobi, Kenya Dec 2024 – Present

- Engineered bulk, on-demand, and subscription billing flows on a microservices platform, improving payment processing flexibility for clients across East Africa.
- Built end-to-end USSD integration enabling users to apply for and track loans directly from feature phones, extending product reach to low-connectivity users.
- Developed a Project and Asset Management module with real-time tracking of deliverables and resources, improving operational reporting accuracy for clients.
- Collaborated across cross-functional teams to deliver third-party API integrations (Safaricom, Africa's Talking), managing complex stakeholder requirements under tight deadlines.
- Maintained detailed technical documentation and Confluence knowledge bases for microservices architecture.

IT Support Intern | Ministry of Lands — Nairobi, Kenya Jan 2025

- Enrolled and configured workstations on Active Directory domain, ensuring secure, compliant network access across government departments.
- Diagnosed and resolved hardware, software, and network faults, maintaining system uptime and minimising operational disruptions.
- Installed and maintained enterprise operating systems and applications across multiple departments.

HR Systems Intern | Aga Khan Academy — Mombasa, Kenya Sept 2023 – Nov 2023

- Maintained employee leave records and performed accurate data entry within the Microsoft Dynamics Navision ERP system, ensuring high data integrity for HR reporting.
- Processed visa extensions and student pass applications on the EFNS platform in full compliance with regulatory requirements.
- Streamlined HR reporting workflows, reducing manual processing time and improving efficiency for the HR team.

EDUCATION

BSc Computer Science | Technical University of Mombasa Sept 2020 – Dec 2024

- Relevant coursework: Software Engineering, Artificial Intelligence, Machine Learning, Data Structures & Algorithms, Database Management Systems, Computer Networks.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Software Development Certificate** — Power Learn Project
- **Applied Data Science Lab** — WorldQuant University (2025): advanced data analysis, statistical modelling, and applied data science.
- **Oracle Cloud Infrastructure Foundations Associate** (2025): foundational cloud architecture and enterprise systems knowledge.
- **Machine Learning Specialization** — Coursera / Andrew Ng (2022): quantitative modelling, predictive analytics, and algorithm design.

RELEVANT PROJECTS

- **Microfinance Loan Status System (USSD)** | Pendomedia, 2025 — Designed and deployed a two-server USSD architecture enabling loan applications and status checks via feature phone menus.
- **Stanford OS — Student Management System** | Contributor — stanfordos.co.ke
- **Stanford Services** | Contributor, in development — Subscription product giving small businesses such as salons, kinyozi (barbershops), and tattoo shops their own management systems; not yet hosted.
- **Stanford OS Website** | Contributor — www.stanfordos.co.ke

- **Football Score Predictor** | Personal Project, 2024 — Built a Random Forest classifier on historical match data, exposing predictions via a REST API.
- **Leave Management System** | Personal Project, 2024 — Designed a full-featured HR workflow system with role-based access control.

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, SQL, PHP, Java
Frameworks & Libraries: Django, FastAPI, Vue.js, NestJS, scikit-learn, Pandas, NumPy
Architecture: Microservices, RESTful API design and integration, Docker, RabbitMQ
Databases & Data Tools: PostgreSQL, MySQL, SQLite; data analysis with Pandas and Excel
Tools & Platforms: Git, Confluence, Microsoft Office Suite (Excel, Word, PowerPoint), Linux/Windows
Soft Skills: Analytical thinking, attention to detail, written & verbal communication, teamwork, adaptability, time management

LANGUAGES

English — Fluent (written & spoken) • Swahili — Native
